+ Cuddalore, Tamil Nadu, India

§ https://github.com/8bit-krishna

Computer Science undergraduate with hands-on experience in Full Stack Development and Machine Learning. Proficient in developing scalable web and mobile applications using Python, ReactJS, Flutter, NodeJS, MySQL, and MongoDB. Strong understanding of Data Structures, DBMS, REST APIs, and Object-Oriented Programming, with a passion for building efficient software solutions and continuously learning modern technologies.

Skills

Languages :
Python, Java, C, SQL, Dart

Core CS Concepts :
Data Structures and Algorithms, OOP, DBMS, Operating Systems.

Web and Mobile Development :
HTML, CSS, JavaScript, ReactJS, Flutter, Firebase

Backend and Databases :
NodeJS, ExpressJS, REST APIs, MySQL, MongoDB

Tools and Platforms :
Git, GitHub, Vercel, Netlify, Chart.js, Streamlit

Education

Dhanalakshmi Srinivasan College of Engineering — 2022 – 2026
Bachelor of Engineering (Computer Science and Engineering) — CGPA: 8.2/10
Coimbatore, Tamil Nadu.

Tagore Public School — 2021 – 2022
Senior Secondary (CBSE) — 78%
Salem, Tamil Nadu.

S.R.K International School (CBSE) — 2019 – 2020
Cuddalore, Tamil Nadu. — 70%

Pro jects

Agentic AI for Software Engineering Using LangGraph | April 2026 - May 2026

- Developed an agentic AI framework using LangGraph to automate key phases of the Software Development Life Cycle (SDLC).
- Designed and implemented three collaborative AI agents—Planner, Architect, and Coder—to analyze requirements, generate system architecture, and produce modular source code.
- Built multi-agent workflows for requirement analysis, project planning, architecture design, and automated code generation.
- Improved software development efficiency by reducing manual effort and ensuring consistency across SDLC phases through AI-driven orchestration.
- Leveraged Python, LangGraph, LLMs, and Git to build and manage the end-to-end multi-agent system.

- Tech Stack:
  Python, LangGraph, LangChain, OpenAI/Gemini API, Git
